McLean Budden Profile

Headquarters:	Toronto, Canada
Founded:	1947
Assets under Management:	\$32.6 billion
Ownership:	40% Employees 60% Sunlife
Staff (total/professional):	106/57

McLean Budden is a global manager and one of Canada's oldest investment counseling firms, managing over \$30 billion for Canadian Investors from offices in Toronto, Montreal, Vancouver and Chicago.

The firm has a strong presence in global financial markets and pays strict attention to client requirements. Pension funds, endowments and foundations, insurance companies, private investors, mutual fund investors, multi-employer funds, group RRSP's and money purchase funds all use McLean Budden to realize their investment objectives.

Investment Professionals

McLean Budden emphasizes a team approach to investing. Since we believe that investment management firms are only as good as their people, McLean Budden concentrates on hiring and retaining well-educated individuals with solid research, client service and portfolio management experience.

By promoting a strong team philosophy and offering a wide distribution of ownership positions to all key employees, McLean Budden maintains the depth and stability of global investment expertise needed for today's investors.

Investment Philosophy

Superior equity investments are over time the largest potential source of 'added value' to a portfolio. Our equity management focuses on security selection to add most of the value. McLean Budden stresses fundamental research as its primary tool for investment analysis and portfolio management.

The portfolio managers together with the equity research group cover the global equity markets with specific research responsibilities divided according to areas of expertise. A defining characteristic of our firm is that our investment management approach has been consistently applied through various market cycles.

Equity investments tend to be in large capitalization companies which have strong growth potential in terms of both the industry in which they operate and the company itself.

The investment managers at McLean Budden adhere to three basic principles of investment management: to add value in the management of each asset class; to lessen volatility in asset mix management; and to adhere to the long-term risk/reward profile of each mandate.

Investment Objective & Strategy

To provide a superior rate of return, primarily through both income and capital appreciation, by investing in a diversified portfolio of about 25 to 30 stocks. The portfolio is predominately large cap growth oriented with a focus on long-term fundamentals.

Investment Style

McLean Budden employs a bottom up investment discipline. Companies with stable earnings growth, strong management teams, and sound balance sheets are emphasized. Each holding must possess superior return potential based on work conducted by the research team in order to be included.

Investor Suitability

The McLean Budden Canadian Equity strategy is ideal for investors seeking:

- A diversified portfolio of Canadian equities
- A portfolio with the benefits of growth with moderate risk
- A portfolio with an emphasis on high quality global companies chosen for their above average earnings growth, strong management and solid financial positions
