McLean Budden Money Market Fund for the year ended December 31st, 2010

Investment Objective and Strategies

The Fund aims to provide investors with high investment returns primarily through income, with reasonable safety of capital. The Fund seeks to preserve capital and maintain liquidity while maximizing short-term income through a diversified portfolio of high quality Canadian short-term debt issues.

Risk

The Fund holds a diversified portfolio of short-term fixed income securities. As a result, the principal risks applicable to the Fund are credit and interest rate risk.

Overall the portfolio construction process has remained consistent over the year and the manager believes that the risk profile has not changed, nor has the suitability profile been affected.

The manager is not aware of any other Fund changes during the year that have affected the overall level of risk associated with an investment in the Fund.

Results of Operations

The Fund's return for the year ended December 31, 2010 was 0.43%* versus 0.54% for the benchmark**.

As anticipated at the beginning of the year, the Bank of Canada raised interest rates a number of times. The first increase occurred in June as the Bank of Canada became the first G7 central bank to raise rates by moving from 0.25% to 0.50%. In the third quarter it felt that conditions remained "excessively stimulative" and raised the rate in two increments of 0.25% in July and September, finishing the year at 1.00%. Subsequent to these moves the Bank of Canada expressed concern over the rising levels of personal debt and made the decision to leave interest rates at 1.00%.

The 3-month Canadian Treasury Bill yield increased to 1.00% from 0.18% at the beginning of the year, while the 1-year T-Bill's yield rose to 1.41% from 0.70%. Over the year the team continued to utilize high quality, short-term corporate issues that offer a more attractive yield than those provided by the Government of Canada.

The portfolio maintains a high proportion of quality corporate and provincial holdings to boost overall yield.

* The Fund's return is after the deduction of fees and expenses associated with Class D units. There are no fees deducted from the benchmark's return. For Class A, C, F and O returns, please refer to the Annual Returns section on page 5.

** The McLean Budden Money Market Fund utilizes the following benchmark: DEX 91 Day T-bill.

Recent Developments

The Canadian economy remains a G7 growth leader, with employment fully recovered from the recession. However, the housing market and high levels of household debt are likely to emerge as a constraint on consumer spending. Improving U.S. and global growth bodes well for exports, but the overvalued Canadian dollar will dent external sales. The Bank of Canada kept its overnight interest target rate at 1.00% during the fourth quarter and will likely remain on hold for some time with inflation pressures muted and the Canadian dollar at overvalued levels.

Related Party Transactions

As Portfolio Advisor, McLean Budden Limited (MBL) carries out research and selects, purchases and sells portfolio securities for the Fund. As Manager, MBL provides or arranges for the provision of all general management and administrative services required by the Fund in its day-to-day operations.

As a result of providing the aforementioned services for the Fund, MBL receives a monthly management fee based on the average net assets of each Class. Effective July 1, 1998, the Manager, at its discretion, has assumed responsibility for payment of all administrative expenses, except for those related to the Independent Review Committee (IRC), and will continue to absorb these expenses until unitholders receive at least 60 days written notice of change.

MBL is a 66.9% owned indirect subsidiary of Sun Life Financial Inc. In compliance with National Instrument 81-107, which came into effect November 1, 2007, MBL has appointed an IRC to review and possibly make recommendations regarding all conflict of interest matters brought to it by MBL including, but not limited to, holdings of Sun Life. Each year, the IRC will provide a report, free of charge, to unitholders. The reports can be obtained by contacting MBL at (416) 862-9800 and will be posted at www.mcleanbudden.com.

Management Fees

The following table shows the Fund's annual management fee and trailer fee rates. The management fee for each class is an annualized management fee calculated based on the Net Asset Value of that class. The management fee is accrued daily and paid out at month-end. HST is payable on all management fees.

McLean Budden pays trailer fees to authorized distributors and dealers of Class A and D units. Trailer fees are calculated as a percentage of the average daily value of the fund. McLean Budden pays these fees quarterly to the distributors and dealers out of the management fees. For the period ended December 31, 2010, McLean Budden paid 12.89% of the total management fee revenues received from all McLean Budden Mutual Funds that were used to fund distribution related costs paid to registered dealers and brokers.

	Annually				
	Class A	Class C	Class D	Class F	Class O
Management Fee (%)	0.65	0.05	0.55	0.45	0.00
Trailer Fee (%)	0.25	N/A	0.10	N/A	N/A

For services as Manager, MBL receives an annual management fee for Class D units, that is not to exceed a maximum of up to 0.75%, excluding taxes, of the average Net Asset Value of the Fund:

Management fee range	0.20%-0.35%
As a percentage of Management Fee:	
Trailer Fees	18%
Investment Management and Administration	82%

This actual fee will remain in effect until unitholders receive at least 60 days written notice of an increase.

A management fee ranging between 0.20% to 0.35%, excluding taxes, was payable by each Class A unitholder. Your advisor may charge you a separate fee in addition to the Management Fee.

A management fee of 0.05%, excluding taxes, was payable by each Class C unitholder. In addition, holders of Class C units or an intermediary pay a management fee of up to a maximum of 1.50% payable directly to the Manager.

A management fee ranging between 0.20% to 0.35%, excluding taxes, was payable by each Class F unitholder. Your advisor will charge you a separate fee in addition to the Management Fee.

There is no management fee applicable to Class O units. You will pay the manager directly if you hold this class of units.

The Fund is responsible for its management fee, the cost of investments and related brokerage fees and for any borrowing costs, bank charges, taxes and administrative expenses. Effective July 1, 1998, the Manager has assumed responsibility for payment of all administrative expenses of the Funds. These expenses include the cost of complying with regulatory requirements, the fees or expenses charged to the Manager for calculation of Net Asset Value, the fees of the Trustee, custodian, auditors and legal counsel and other administrative costs arising in the ordinary course of the operation of the Fund. The Manager will continue to assume responsibility for the payment of the administrative expenses until unitholders receive at least 60 days written notice of a change.

¹ This information is derived from the Fund's audited annual financial statements. The net assets per unit presented in the financial statements differs from the Net Asset Value calculated for fund pricing purposes. (An explanation of these differences can be found in the notes to the financial statements.)

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. The above calculations include combined actual and average data; therefore, the table will not total accordingly.

³ Distributions were paid in cash or reinvested in additional units of the Fund, or both.

⁴ Net assets beginning of the year were adjusted to reflect changes in Canadian GAAP.

Past Performance

For the year ended December 31st, 2010

The performance information shown below assumes that all distributions made by the investment fund in the periods shown were reinvested in additional securities of the investment fund. The performance information does not take into account sales, redemptions, distributions or other optional charges (which distributors other than McLean Budden may charge) that would have reduced returns or performance. How the investment fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns (%)

The bar chart below shows the annual performance of each class of the Fund for each of the years shown, and illustrates how the Fund's performance has changed from year to year. Note on Forward-Looking Statements

This document contains forward-looking statements. Such statements are generally identifiable by the terminology used, such as “plan”, “anticipate”, “believe”, “intend”, “expect”, “estimate”, or other similar wording. These forward-looking statements are subject to known and unknown risks and uncertainties and other factors which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements. Such factors include, but are not limited to: general economic, market and business conditions; fluctuations in securities prices, fluctuation in interest rates and foreign currency exchange rates; and actions by governmental authorities. Future events and their effects on the Fund may not be those anticipated by us. Actual results may differ materially from the results anticipated in these forward-looking statements. We do not undertake, and specifically disclaim, any obligation to update or revise any forward-looking information, whether as a result of new information, future developments or otherwise.

Future Accounting Policy Changes

The Canadian Accounting Standards Board approved a deferral from International Financial Reporting Standards (IFRSs) adoption for investment companies applying Accounting Guideline AcG-18, *Investment Companies*. Investment companies will be required to mandatorily adopt IFRS for interim and annual financial statements relating to annual periods beginning on or after January 1, 2013.

The key elements of the changeover plan deal with the requirements for financial reporting, Net Asset Value per share calculations, systems and processes, and training. The plan also sets out the timeline for implementation of the changes and the required technical training or other support required for a smooth transition.

As at December 31, 2010, some anticipated changes to financial reporting include:

- Compliance with the full body of IFRS without industry specific exemptions, unlike Canadian Generally Accepted Accounting Principles where investment fund accounting was based upon guidance in Accounting Guideline 18 – Investment Companies (“AcG-18”);
- Without exemption under AcG-18, a Fund must consolidate all controlling entities, or be consolidated with the entity which controls it;
- Changes to the presentation of shareholder equity to consider puttable instruments;
- Presentation of comparative information; and
- Additional financial statement note disclosures on the recognition and classification of financial instruments.

Due to anticipated changes in IFRS prior to the transition to IFRS, the Manager cannot conclusively determine the full impact of the transition to IFRS on the Fund's financial results at this time. Based on the Manager's current understanding and analysis of IFRS as compared to the current accounting policies under Canadian GAAP, the Manager does not anticipate that the transition to IFRS will have a material impact on the Fund's Net Assets per share, nor systems and processes, and it is expected that it will mainly result in additional note disclosure in the financial statements. Implementation of the changeover plan is progressing as scheduled. The Manager will continue to monitor ongoing changes to IFRS and adjust the changeover plan accordingly.
